CAPABILITY NARRATIVE

PeakVisibility Partners is a veteran-owned small business specializing in cybersecurity compliance and risk advisory services. We help defense contractors, federal agencies, and technology companies achieve and maintain compliance with CMMC, NIST 800-171, and SOC 2 frameworks, on time, on budget, and audit-ready.

Our practitioners bring over 20 years of hands-on experience in information security, technology risk, IT audit, and regulatory compliance — including senior roles at major financial institutions. Our team holds CISA and CISSP certifications and has operated within regulatory environments governed by OCC, SEC, FFIEC, GLBA, PCI, and SOX. We embed in your environment, build practical controls, produce evidence auditors expect, and leave behind sustainable processes your team can maintain.

CORE COMPETENCIES

CMMC Readiness

Gap assessments, SSP/POAM development, control implementation, and evidence packaging for CMMC Level 1 & 2 compliance.

NIST 800-171 Compliance

CUI boundary scoping, control gap analysis, System Security Plan development, and assessor-ready evidence packages.

SOC 2 Audit Readiness

Type 1 and Type 2 readiness programs — control design, policy development, evidence collection, and audit coordination.

Risk & Controls Advisory

Technology risk assessments, control testing, governance frameworks, and regulatory alignment (OCC, SEC, FFIEC, GLBA, PCI, SOX).

Policy & Documentation

Security policy suites, procedures, evidence indexes, and compliance playbooks built to auditor and assessor standards.

Training & Adoption

Compliance awareness training, tabletop exercises, train-the-trainer programs, and after-action reporting.

DIFFERENTIATORS

- Evidence-first delivery — every engagement is built around what assessors and auditors actually look for
- Senior CISA/CISSP-certified practitioners embedded directly in client environments
- Rapid mobilization — audit-ready programs delivered in 6–14 weeks depending on scope
- Plain-language reporting so leadership understands risk, cost, and timeline at a glance
- Sustainable outcomes — we train your team so results stick after engagement ends
- Veteran-owned, mission-aligned — we understand compliance as a discipline, not a checkbox

CORPORATE DATA

Legal Name: PeakVisibility Partners LLC

UEI: MJP5GDK1CE74

CAGE Code: 15PX2

Business Type: LLC

Ownership: Veteran-Owned Small Business (VOSB)

Service-Disabled: Pursuing VA Determination

SAM.gov: Active & Current

HQ: Charlotte, NC — National Remote Delivery

POC: Dezmond X. Shumaker, Founder & CEO

- 20+ years enterprise information security, technology risk, and IT audit
- Regulatory compliance experience: OCC, SEC, FFIEC, GLBA, PCI, SOX
- Senior practitioner background: Wells Fargo, TIAA

CERTIFICATIONS & DESIGNATIONS

- Veteran-Owned Small Business (VOSB) — SAM.gov registered
- Service-Disabled Veteran-Owned — VA determination in progress
- Minority-owned — pursuing applicable certifications

HOW WE WORK

We operate on a sprint-based model — defined scope, clear milestones, and evidence packages built to pass scrutiny. Every engagement follows four phases:

- Phase 1 — Gap Assessment: Scope the environment, identify control gaps against the target framework, and produce a prioritized remediation roadmap
- Phase 2 — Control Implementation: Build and deploy policies, procedures, and technical controls with named owners and acceptance criteria
- Phase 3 — Evidence Collection: Compile an auditor-ready evidence package mapped to every requirement — nothing left to chance before assessment day
- Phase 4 — Audit Coordination: Support assessor or auditor engagement, respond to findings, and deliver a final readiness brief to leadership

RELEVANT EXPERIENCE

Our team brings demonstrated experience across the following engagement types:

- CMMC Level 1 & 2 readiness programs — gap assessments, SSP/POAM development, control implementation, and evidence packaging for defense suppliers
- NIST 800-171 compliance — CUI scoping, System Security Plan authoring, and assessor-ready evidence packages
- SOC 2 Type 1 & Type 2 readiness — policy development, control design, evidence collection, and audit coordination for SaaS and technology companies
- Enterprise IT audit and technology risk programs at major financial institutions — internal controls, regulatory examinations, and third-party risk assessments
- Security policy suites and compliance playbooks across defense, financial services, healthcare, and technology sectors
- Compliance training programs including tabletop exercises, awareness campaigns, and train-the-trainer delivery
